

Superpro Moisture Analyzer

The portable grain Moisture Analyzer with built-in grinder

The Superpro Moisture Analyzer is a new generation of digital moisture testers which gives you a consistent test result.

The grain is ground and compressed in one operation which together with the automatic temperature compensation leads to a proven more reliable result.

Use it in the field
and on grain hot from
the dryer

Superpro Moisture Analyzer

The portable grain moisture tester that you can rely on

Additional advantages:

- ◆ Digital, two-line display with 1/10% read-out
- ◆ Combined grinding and compression of sample
- ◆ Built-in measuring cups
- ◆ Backlight display
- ◆ Automatic temperature compensation
- ◆ Grinding parts of hardened galvanized steel
- ◆ Cabinet made of shockproof ABS plastic
- ◆ Automatic average value
- ◆ Individual calibration adjustment for each type of grain
- ◆ Can be updated with new moisture scales
- ◆ Shockproof carrying case
- ◆ 2-year limited guarantee

Technical specification:

Measuring range (Moisture)	: 5% to 45% depending on type of grain tested
Operating Range (Temperature)	: 0 to 45 deg. C.
Resolution	: 0,1% moisture
Temperature compensation	: Automatic
Display	: Digital, two line
Size	: 13 x 21 x 8 cm
Weight including suitcase	: 1,8 kg
Battery	: 9 volt alkaline
Accuracy	: Better than +/- 0,5% *

* in normal moisture range by using averaging and calibration

This is how easy it is to operate
The Superpro Moisture Analyzer :
Simple straight forward operation
with only 4 keys.

1. Turn on the tester by pressing the ON/TEST button. Use the arrow keys ↑ or ↓ to select grain type.

2. Pour the sample into the grinder. The sample size is measured out in the built-in measuring cups.

3. Grind the sample and press the ON/TEST button.

4. Read the moisture content directly from the display.
